

SWEET 46

Le geometrie equilibrate di Sweet 46 sono l'espressione di un design trasversale e multiforme. Nel rubinetto per lavabo il parallelismo tra la maniglia a leva e la bocca di erogazione dalle forme rettangolari e piatte si abbina al volume cilindrico del corpo, dando vita a un mix piacevole ed eclettico.

The balanced geometries of the Sweet 46 collection are the result of a transversal and manifold design. The parallelism between the lever and the flat rectangular water spout blends perfectly with the full cylindrical body of the wash basin mixer, giving life to a pleasing and eclectic combination.
